Reclaimed street pavers used as an external material. L.L. Bean- Barrington IL.

Reclaimed Chicago common brick.

Reclaimed Granite Pavers

THE POINT SYSTEM

The intent is for a building to accumulate the required "points" in order to label it as GREEN. This system of numbers will depend on the overall square footage of the project i.e. 1501 sq/ft, would require a minimum of 20 Green Points.. Obviously this number can be achieved by a multitude of trades and their materials. By using a reclaimed material you can achieve a point for both recycled material and a point for the material originating within a 500 mile radius.

WHAT IS LEED?

LEED , or Leaders in Energy and Environmental Design, represents the US Green building council's effort to provide a national standard for what constitutes a "GREEN BUILDING". Bricks Inc. can help you achieve this by supplying material for the exterior and/or interior of your project (see images to the left).

HISTORY

Over the last 40 years, Bricks Inc has supplied architects, contractors, and home owners with reclaimed masonry units. We specialize in finding, reclaiming, palletizing, and shipping these materials. All of which are shipped out of our yard at 3425 S. Kedzie Ave in Chicago. We pride ourselves in providing excellent service to our clients; please come visit our facility to see for yourself before you buy or specify them. Many of our units are shipped all across the United States and used for various applications. If you would like to schedule a visit to our yard, please contact a member of our sales team by viewing our website at www.bricksinc.net.

Our current stock of Chicago Commons is well over 1 Million, all of which are ready to be loaded onto one of our boom trucks and shipped directly to your job.
